Profile

Passionate mobile app developer with hands-on experience in Flutter, Firebase, and REST API integration. Skilled in building scalable, user-friendly applications with clean architecture (MVC/MVVM) and efficient state management. Experienced in collaborating with backend teams to integrate APIs and ensure seamless app functionality. Currently learning German to communicate effectively in professional settings. Enthusiastic about delivering high-quality, maintainable code and contributing to innovative mobile solutions for diverse clients.

Education

BACHELOR OF SCIENCE IN COMPUTER SCIENCE
BABA GURU NANAK UNIVERSITY NANKANA SAHIB
Expected Graduation: 2026 ***| CGPA: 3.63***

Technical Skills

LANGUAGES: DART, PYTHON, C++, SQL
FRAMEWORKS: FLUTTER, FASTAPI, FLASK
DATABASES: FIREBASE, SQLITE, HIVE
STATE MANAGEMENT: PROVIDER, MVVM, MVC
TOOLS: GIT, ANDROID STUDIO, VS CODE, PYCHARM, POSTMAN
OTHER SKILLS: REST APIS, UI/UX DESIGN, APP DEPLOYMENT Experience

Projects

Smart Journal App – SoftBloom (Flutter + Firebase)

- Built a personal journaling application with mood tracking, journaling streaks, and personalized affirmations.
- Implemented voice recognition and chatbot-based prompt guidance.
- Integrated Firebase Authentication, Firestore, and Realtime Database for persistent and real-time data handling.
- Designed a clean, modern UI following scalable architecture principles.

AI Quiz Generator App (Flutter + Firebase)

- Developed an AI-based quiz generation system for dynamic and personalized quizzes.
- Implemented Firebase Authentication and Firestore for tracking user progress.

- Used Provider with MVVM architecture for maintainable and scalable codebase.
- Designed adaptive UI for multiple screen sizes and devices.

Employee Management System (Flutter + Firebase)

- Developed role-based dashboards (Admin/Student) with Firebase Authentication.
- Built modules for attendance management, fee tracking, announcements, and registrations.
- Implemented real-time synchronization using Firestore.

StackFix – Developer Issue Tracking App

- Built a task and bug tracking application to manage feature requests and issue lifecycles.
- Implemented issue categorization, priority tagging, and status-based workflows.
- Applied clean architecture principles and efficient state management.
- Focused on productivity-oriented UI design.

RepoGuide – GitHub Repository Learning Assistant

- Developed an application to help developers understand repository structure and onboarding processes.
- Integrated REST APIs to fetch and display repository data dynamically.
- Designed structured project visualization to simplify repository exploration.
- Ensured modular, scalable, and maintainable code practices.

Flutter Music Player App

- Built a feature-rich music player with playlist management, play/pause, seek, and shuffle functionality.
- Integrated audio player package with Provider state management and MVVM architecture.

Lingolens – AI-Based Language Learning App (Ongoing)

- Currently developing an AI-powered language learning mobile application.
- Implementing dynamic quiz generation, vocabulary tracking, and user progress analytics.
- Integrating REST APIs and Firebase services for authentication and real-time data handling.
- Designing scalable architecture with clean state management for production readiness.
- Focused on delivering an intuitive, modern UI optimized for user engagement

Certificates & Achievements

- Flutter Development — Google Developers (2022)

Personal Statement

I enjoy writing clean, efficient, and maintainable code that balances performance with user experience. I have experience working closely with backend teams to integrate APIs and ensure

smooth, scalable mobile applications. I am continuously expanding my skills in Flutter, backend development, and app deployment, and I am currently learning German to communicate confidently in collaborative projects. My goal is to contribute to impactful mobile applications that feel personal, user-centered, and technologically advanced.
